SECTION 1. INTRODUCTION

Burton & Associates has conducted a Financial Sustainability Analysis (Analysis) for the Sanitation Enterprise Fund (Enterprise) of the City of Fort Lauderdale (City). The following sections of this report describe in detail the assumptions, procedures, results, as well as the conclusions and recommendations of the Analysis.

1.1 BACKGROUND

One component of the municipal services that the City provides for its citizens is the collection and sanitary disposal of waste. There are multiple waste streams that the city disposes of such as yard waste, commercial, and recyclables, but by far the largest is household garbage. The city collects this waste street side and then contracts with a disposal company to responsibly eliminate it. The financial transactions relating to sanitation service are conducted within the Sanitation Enterprise Fund. Given the unique financial challenges of providing this service the city has contracted with Burton & Associates to perform a Financial Sustainability Analysis.

1.2 OBJECTIVE

The objective of this Analysis is to develop a plan of revenue increases that will ensure sufficient revenue will be generated to support the funding of all of the Enterprise Fund's requirements (including operation and maintenance expenses, and adequate reserves) over a ten-year projection period.

SECTION 2. ANALYSIS

2.1 DESCRIPTION

This section presents the financial management plan and corresponding plan of revenue increases developed during the Analysis. The first sub-section presents a description of the base data, assumptions, and policies reflected in the Analysis. The second subsection provides the results of the Analysis, while Appendix A includes detailed schedules supporting the financial management plan identified herein.

In the Analysis, we developed alternative ten-year financial management plans and corresponding rate revenue adjustment plans through several interactive work sessions with Sanitation department staff. During these work sessions we examined the impact of various alternatives upon key financial indicators by use of graphical representations projected on a large viewing screen from our computer rate models. In this way, we developed rate revenue adjustment plans for each alternative financial management plan identified, including the recommended financial management plan presented in this report, which will allow the Enterprise Fund to fund its system requirements throughout the projection period and meet its financial performance goals and objectives.

In order to initialize our analysis, we obtained the historical and budgeted financial information regarding the operation of the Enterprise. We also counseled with City staff regarding other assumptions and policies that would affect the financial performance of the fund such as demands, additional expenses outside of the fund's budgets, required levels of operating and capital reserves, earnings on invested funds, escalation rates for operating costs, etc.

All of this information was entered into our proprietary Financial Analysis and Management System (FAMS-XL©) interactive model. The FAMS-XL© model produced a ten-year projection of the sufficiency of the current revenues to meet all of the Enterprise's current and projected financial requirements and determined the level of

revenue increases necessary in each year of the projection period to provide sufficient revenues to fund all of the Enterprise Fund's cost requirements.

FAMS-XL© utilizes all projected available and unrestricted funds in each year of the projection period to pay for capital projects. The model is set up to reflect the rules of cash application as defined and applied by the City, and produces a detailed summary of the funding sources to be used for each project in the capital improvement program.

2.2 ASSUMPTIONS

We communicated with City staff regarding the following assumptions, base data, policies, and parameters utilized in the Analysis:

Beginning Fund Balances – The FY 2012 Comprehensive Annual Financial Report and supporting data provided by City staff as of September 30, 2012, were used to establish the beginning FY 2013 balances for each of the various funds for the Utility.

Cart Usage Projections – In consultation with staff a forecast was developed of the demand for residential sanitation carts. This forecast was then utilized in the model to determine the number of carts in use over the 10 year projection period.

Solid Waste Disposal Contracts – During the commissioning of this study the City entered into contract negotiations with waste disposal contractors. These contractors dispose of the waste that the city collects and charge the Sanitation Enterprise Fund a fee per ton. The negotiations resulted in the city choosing Wheelabrator's option 3 for household waste disposal and Sun-Bergeron for yard waste disposal. The updated cost per ton of waste and cash singing bonuses were included in this analysis.

Operating Expenditures – The FY 2013 operating cost requirements are based upon the FY 2013 Budget and seven months of FY 2013 actual operating results, include all operating and maintenance expenses, transfers for capital investment, inter-fund transfers, and minor capital outlay. In FY 2014, operating expenditures were calibrated in total to the FY 2014 Adopted Budget, and then projected annually thereafter based upon assumed cost escalation factors for individual expense categories.

GERS Scenarios – Finance department staff also provided a report from GRS in relation to the outstanding pension obligations based on 4 different scenarios, which varied the assumed rate of return in addition to other variables. The financial model was built to take this in to account and allowed for the effects of any of the scenarios to be modeled & their impacts quantified.

Return on Investment charge – Based upon the City's Adopted Budget for FY 2014, the Sanitation Enterprise fund will continue to be assessed an annual return on investment charge. Although unlike past years in which the fund incurred a direct expense from the general fund, this year the general fund will net out the ROI charge from the private hauler fees that it collects and transfers to the Enterprise Fund.

Cost Escalation – Annual cost escalation factors for the various types of operating and maintenance expenses were provided by City staff and applied in each year of the projection period beginning in FY 2015.

Minimum Operating Reserve Balances – The financial management plan presented in this report assumes that the Enterprise will maintain a minimum fund balance in its operating fund of at least two month of operations & maintenance (O&M) expenses. This level of reserve is consistent with our industry experience for similar systems.

2.3 RESULTS

It is anticipated that the Enterprise fund can forgo revenue adjustments in FY 2014 or FY 2015, as direct result of the solid waste disposal contract negations and a resource recovery board refund. These two one-time cash infusions into the Enterprise resulted in a temporary cash reserve well in excess of the funds stated target, thus allowing the fund to forgo rate adjustments for two years. In FY 2016 it is expected that the fund balances will return to more normal levels and rate adjustments will be needed going forward.

The recommended financial management plan and corresponding plan of revenue adjustments is based upon the revenue and expense information, beginning balances, assumptions, and plan of finance as described in this section of the report. Appendix A includes several detailed schedules presenting key aspects of the ten-year financial

management plan, while the required revenue adjustment plan for the immediate fiveyear planning period is presented in the table below:

Table 1. Recommended Sanitation Rate Revenue Increases

| | FY 14 | FY 15 | FY 16 | FY 17 | FY 18 |
|----------------|---------|---------|---------|---------|---------|
| Effective Date | 10/1/11 | 10/1/12 | 10/1/13 | 10/1/14 | 10/1/15 |
| Rate Increase | 0.00% | 0.00% | 9.43% | 13.88% | 2.92% |
| | | | | | |

2.4 CONCLUSIONS & RECOMMENDATIONS

We have reached the following conclusions and recommendations regarding the sufficiency of the Enterprise's current revenue over the projection period:

- Based upon the assumptions and base data described herein, the current revenues will satisfy the Enterprise's annual operating expenses, and operating reserve requirements through FY 2015. Thereafter the utility may require rate adjustments.
- We recommend that the City adopt the recommend rate schedule identified herein for FY 2014 through FY 2018. In addition, the City should perform updates to this analysis on an annual or bi-annual basis to evaluate the adequacy of its revenues and plan of annual rate increases. Doing so will allow for the incorporation of updated revenue and expense information and changes in economic conditions so that any necessary adjustments to planned rate increases can be made to allow the Enterprise to meet its requirements during the projection period and minimize rate impacts from future events which occur differently than currently projected.

Appendix A – Supporting Schedules

Schedule 1 contains the assumptions of the analysis

Schedule 2 contains the cost escalation factors utilized to forecast the sanitation funds expenses

Schedule 3 contains the historical sanitation cart usage

Schedule 4 contains projections of the sanitation cart usage throughout the 10 year forecast period

Schedule 5 contains the end of FY 2012 fund balances that serve as the FY 2013 beginning balances of the analysis

Schedule 6 identifies the annual capital expenditures utilized in this analysis

Schedule 7 contains a detailed list of all projected cash outflows from FY 2013-23

Schedule 8 contains a detailed list of all projected cash inflows from FY 2013-23

Schedule 9 contains the FAMS-XL© Control Panel that presents a summary of the financial management plan, including annual rate increases, total CIP spending levels, rates, and fund balances

Schedule 10 presents annual net income, debt service coverage, and cash flow results

Schedule 11 shows the funding sources utilized to pay for the capital expenditures included in the analysis

Schedule 12 presents a fund-level cash flow reconciliation, providing the beginning balance in each year, the amount utilized for project funding or payment of debt service, interest calculations, and the end of year fund balance.

Note: (1) Certain personal expenses are calculated as percentage of salaries, rather than escalated

⁽²⁾ This escalation is based on the annual average escalation of operations and maintenance expenses

⁽³⁾ ROI is only an expense in 2013, from 2014 on it is handled though a transfer-in from the general fund which are the private collection fees net of ROI, per staff direction
